

## Diagnostic tests

1. Test for colorimetric determination of urinary serum calcium (45 determinations);
2. Test for determination of serum iron (50 determinations);
3. Test for determination of urinary serum chlorine (100 determinations);
4. Test for colorimetric determination of urinary serum magnesium (100 determinations);
5. Test for colorimetric determination of anorganic phosphorus in serum, plasma and urine (100 determinations);
6. Test for colorimetric determination of total serum lipids (50 determinations);
7. Test for colorimetric determination of uric, seric and urinary acid (100 determinations);
8. Test for colorimetric determination of seric and urinary urea (with DAM) (200 determinations);
9. Test for colorimetric determination of seric and urinary urea (with urease) (200 determinations);
10. Test for determination of seric and urinary alpha-amylase (350 determinations);
11. Standard test of Kunkel dysproteinemia with  $ZnSO_4$  (150 determinations);
12. Standard test of dysproteinemia with thymol T.T.T. (150 determinations);
13. Standard test of serum acid phosphatase (100 determinations);
14. Standard test of serum alkaline phosphatase (120 determinations);
15. Standard test of total proteins dosage (100 determinations);
16. Standard test of seric Buche Cholinesterase (60 determinations);
17. Standard test of glucose dosage with o-toluidine (100 determinations);
18. Standard test of serum cholesterol of dosage (100 determinations);
19. Standard test of GOT determination (colorimetric test) (50 or 100 determinations);
20. Standard test of GPT dosage (colorimetric test) (50 or 100 determinations);
21. Standard test of bilirubin dosage (50 or 100 determinations);
22. Standard test of creatinine in biological media dosage (80 determinations);
23. Standard test of colorimetric determination of serum triglycerides (50 determinations);
24. Standard test of gamma-glutamyltransferase (100 determinations);
25. Standard test for determination of LDH in serum (24 determinations);
26. Test for determination of copper in biological media (50 determinations);
27. Test for determination of albumin in urine (100 determinations);

NEW!!!!

28. Acetotest – Quick test for determination of ketone bodies in urine (50 determinations); New !

NEW!!!!

29. Enzymatic test for the determination of glucose with glucoxidase (400 determinations); New !  
NEW!!!!
30. „ICCF-GLICTEST” – test for fast determination of glucose in urine; New !
32. Enzymatic test for the determination of uric acid (100 determinations);
33. Enzymatic test for the determination of GOT
